

COMMITTED TO
SUPERIOR QUALITY AND RESULTS

AGULO CONSULTING GROUP, LLC

COMPANY PROFILE

“We shape our buildings; thereafter, they shape us”
- Winston Churchill

“It is not the beauty of the building you should look at:
it’s the construction of the foundation that will stand
the test of time”
- David Allen Coa

“You can dream, create, design and build the most
wonderful place in the world. But it requires people to
make the dream a reality”
- Walt Disney

REAL ESTATE CONSTRUCTION

We believe that housing is the pillar in every humanity. We have the technical, financial and professional capacity to handle any challenging and complex development. Whether it is a single-dwelling unit to a multi-storey building. We boast of more than twenty combined years of experience in Residential and Commercial projects. Our team of experts have the capability for accurate blue-print implementation of the structural and architectural drawings from ground leveling, landscaping, earthworks, structural reinforcement, interiors and renovations. Our team have handled projects of affordable housing schemes in gated communities to luxurious developments.

We have research thoroughly on alternative building technologies like prefabricated and precast. Our team have experience in accurate implementation of these technologies.

OUR SERVICE

ROADS, BRIDGES AND MARINE ENGINEERING WORKS:

With the latest machinery and technology that we have embraced, we have the capacity to handle Road construction, Bridges and Highways. Airports and Seaports development.

WATER AND SEWERAGE:

Water being a major resource is a key pillar in the construction sector. Our team of professionals have the experience to design and build water resources from borehole drillings, water proofing, water treatment plants, plumbing works and sewerage lines installations.

OUR SERVICE

DAMS AND IRRIGATION:

We can design and build dams and irrigation sites meant for agricultural, energy supply and domestic use. We have embraced the fastest technologies from 3D AutoCAD in design to implementation.

OIL AND GAS WORKS:

Our Electrical and Mechanical Engineering division has the capacity to design and construct Oil refineries and gas plants. We drill oil reservoirs, storage tanks installation and build pipelines. We put measures during construction to maximize quality and safety.

RENEWABLE ENERGY:

Africa is a fast-growing Renewable Energy consumer in the world. From wind power, geothermal and Solar. We have the capacity to handle works from Renewable Energy Development to EPC via our Renewable Energy divisional ENERGY LTD. We have Identified a site to structure and develop a 60 MW of solar power in Isinya - Kajiado county.
